## Want to find even more ideas?

Visit [www.bosch-diy.com/nz](http://www.bosch-diy.com/nz) to find inspirational ideas about home improvement and design. There you will not only find hints and tips on work commonly done around the house, but also construction guides for extraordinary design projects and, of course, up-to-date and comprehensive information about all Bosch DIY tools.

## How does pressure washing work?

Pressure washing works by applying a combination of water and air at a high pressure onto a surface, producing a cleaning effect.

Normal household water supply is about 4 bar (58 psi) whereas water supplied through a garden hose passing through the booster pump produces pressure of around 140 bar (2030 psi).

## Save time, save water.

Bosch high performance water blasters are compatible with alternative water sources. Connect the water attachment to the model and blast away. This saves water and ensures environmentally friendly cleaning as well as offering greater flexibility by expanding the working area.

## Onboard storage feature.

Equipped with a space for accessories, Bosch pressure washers ensure your accessory is always near when you need it.

## Blast it with Bosch

### Main benefits

- ▶ Effective cleaning performance
- ▶ Self-priming pump
- ▶ Compact, space saving storage
- ▶ On-board storage for accessories
- ▶ All metal pump for durability
- ▶ Ready to use straight out of box
